RACKET COURT MAINTENANCE CHECKLIST

Well-maintained tennis and pickleball courts support safe play, consistent performance, and long-term value for the facility. Schools, parks departments, and municipalities often rely on these courts for both organized athletics and community recreation.

The quick checklist below will help your team assess all relevant areas of your facility and create a plan to address any concerns in the notes section. If your team is considering upgrades—such as new post-tension or asphalt tennis or pickleball courts—contact us at info@nemaha.net or call 402.434.5488. Our experts are ready to discuss potential options and help you achieve your goals.

Yes Needs Work

Y NW ROUTINE COURT MAINTENANCE

- | | | |
|--------------------------|--------------------------|--|
| <input type="checkbox"/> | <input type="checkbox"/> | Debris is swept or blown off of court surfaces regularly |
| <input type="checkbox"/> | <input type="checkbox"/> | Net height has been measured and tensioned, if needed |
| <input type="checkbox"/> | <input type="checkbox"/> | Fences and netting have been inspected for containment and safety |
| <input type="checkbox"/> | <input type="checkbox"/> | A protocol is in place to remove debris after severe weather to protect the surface and prevent staining |
| <input type="checkbox"/> | <input type="checkbox"/> | Weeds have been removed along fences and cracks (if applicable). |
| <input type="checkbox"/> | <input type="checkbox"/> | Drain grates are clear of debris |

SEASONAL FACILITY CHECKS

- | | | |
|--------------------------|--------------------------|--|
| <input type="checkbox"/> | <input type="checkbox"/> | Court surfaces have been evaluated for wear, fading texture, or early cracking |
| <input type="checkbox"/> | <input type="checkbox"/> | Drainage systems are checked after rain for areas of water pooling or slow drainage |
| <input type="checkbox"/> | <input type="checkbox"/> | Lighting systems maintain consistent illumination and electrical reliability |
| <input type="checkbox"/> | <input type="checkbox"/> | Any existing algae or mold growth has been treated |
| <input type="checkbox"/> | <input type="checkbox"/> | Perimeter areas have maintained stability without areas of grading changes or settlement |
